

A Full System-Our line of ½” thickbutt exterior siding panels consists of handcrafted eight-foot panels, matching corner systems, radius flares, column wraps and decorator shapes. Constructed using 100% Western Red Cedar, “Natures Finest Siding”, over an integrated fiberglass matte onto a strong plywood backer you get natural beauty and long lasting protection down to the last detail.

Strong & Durable-The ½” Thickbutt Mixed Grain Shingles provide a bold look for upscale residential properties. With wind uplift ratings over 200 MPH and factory finished warranties to 50 years, Cedar Valley is your best choice for premium shingle siding!

Unique Mixed Grain Shingle Panels

½” Thickbutt Mixed Grain Shingles provide the boldest look for the finest properties! Whether it’s a traditional craftsman style or a modern design, Cedar Valley ½” Thickbutt Mixed Grain shingle panels will make your project stand out. Our shadow line and unique cedar grain patterns give a beautiful and distinctive appearance no other siding can achieve! The natural beauty of Western Red Cedar is dramatically accented in the ½” thick-butt mixed grain shingles.

Unmatched Reliability-Offering the ½” Mixed Grain panels with factory applied coatings ensures a low maintenance finish to protect your home for years to come. These coatings come in a “*Rainbow of Colors*” and are applied by a network of Cedar Valley authorized machine pre-finishers across the country. The durability of these coatings allows Cedar Valley to provide extended warranties on the ½” Mixed Grain panel line up to 50 years! (See warranty for details)
